VIEWS

- 10 Getting to Know You**
New JADA Editor Marjorie K. Jeffcoat, D.M.D., introduces herself to readers and pledges that The Journal will continue to stand for truth, progress and quality care for all patients.

LETTERS

- 14** *JADA readers explore rubber gloves and the environment, oral health care for Medicaid-covered children and the practice of dentistry by medical professionals.*

NEWS

- 24** *Researchers in Japan report that estrogen receptor genotypes may be connected to tooth loss in elderly women. In a recent issue of the Journal of Periodontology, Massachusetts researchers present the first evidence that a deficiency in white blood cell function can lead to early-onset periodontal disease. JADA readers respond to the October Question of the Month.*

RESEARCH

- 35 The Impact of Gene Therapy on Dentistry: A Revisiting After Six Years**
Bruce J. Baum, D.M.D., Ph.D., and colleagues
The authors consider the progress that has been made in gene therapy research since 1995.

- 45 Anticipated and Experienced Pain Associated With Endodontic Therapy**
Catherine A. Watkins, D.D.S., M.S., Ph.D., and colleagues
Dr. Watkins and colleagues compare the levels of anticipated and experienced pain in patients who received endodontic therapy with selected patient and dental characteristics.

CLINICAL PRACTICE

- 55 The Mandibular Molar Class III Furcation Invasion: A Review of Treatment Options and a Case Report of Tunneling**
David C. Vandersall, D.D.S., M.S.; Robert J. Detamore, D.D.S.
The authors present a case report involving tunneling, a procedure that facilitates the retention of a mandibular molar with a Class III furcation invasion.
- 61 Surgical Repositioning of an Impacted Dilacerated Incisor in Mixed Dentition**
Tzong-Ping Tsai, D.D.S., M.S.
In this case report, the author describes a 9-year-old girl with an impacted dilacerated maxillary central incisor and demonstrates the timing, technique and results of the surgical repositioning treatment approach.
- 67 Restoration and Retention of Maxillary Anteriors With Severe Root Resorption**
Rhonda R. Savage, D.D.S.; Vincent G. Kokich Sr., D.D.S.
Drs. Savage and Kokich describe the treatment of three patients with severe apical root resorption of maxillary lateral incisors caused by ectopically erupting canines.

CLINICAL DIRECTIONS

72 *A dentist describes a simple technique to help guide the angulation of proximal wall reduction for full crown preparations.*

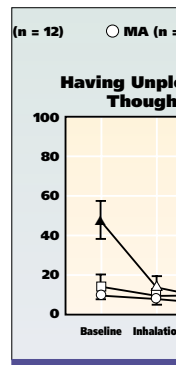

DENTISTRY & MEDICINE

73 **The Physiology, Medical Management and Oral Implications of Menopause**
 Arthur H. Friedlander, D.D.S.
Dr. Friedlander explores the physiological changes associated with menopause, the oral implications and hormone replacement therapy.

CLINICAL PHARMACOLOGY

82 **Preoperative Dental Anxiety and Mood Changes During Nitrous Oxide Inhalation**
 James P. Zacny, Ph.D., and colleagues
This study examines mood changes during nitrous oxide inhalation in patients with different levels of preoperative dental anxiety.

page 82

CONTINUING EDUCATION

89 *JADA's continuing education program highlights the impact of gene therapy on dentistry; anticipated and experienced pain associated with endodontic therapy; physiology, medical management and oral implications of menopause; and preoperative dental anxiety and mood changes during nitrous oxide inhalation.*

TRENDS

93 **The Dental Home: A Primary Care Oral Health Concept**
 Arthur J. Nowak, D.M.D., M.A.; Paul S. Casamassimo, D.D.S., M.S.
The authors describe the medical home and propose a dental home concept to improve families' access to dental care.

DENTISTRY & THE LAW

99 **Challenge to Advertising Rules Rebuffed**
 Peter M. Sfikas, J.D.
Mr. Sfikas explores a decision by a federal trial court in Texas, which dismissed an orthodontist's antitrust lawsuit claiming that a professional association's enforcement of its advertising rules disrupted his relationship with a distributor of an orthodontic product invented by the dentist.

GORDON J. CHRISTENSEN, D.D.S., M.S.D., Ph.D.

103 **Has Tooth Structure Been Replaced?**
Dr. Christensen explores the current trend to cut teeth in less conservative ways than has been practiced in the past.
