COMMENTARY

- 940 **Editorial:** Dental Education: An Evolving Challenge
M. Glick
The JADA Editor emphasizes the need for dental education to provide clinically relevant information and give students the tools and skills that will enable them to assess and apply new knowledge independently.

LETTERS

- 944 JADA readers explore dentistry's role in catastrophic disasters, temporomandibular disorders and centric relation.

NEWS

- 957 **Professional Product Review:** The ADA Professional Product Review debuts with this issue of The Journal of the American Dental Association. University of Florida researchers have identified four genes in an oral pathogen implicated in periodontal disease that allow the bacterium to invade and infect human arterial cells.
- 960 **CyberNews:** ADA News Today now is available through Really Simple Syndication, an online service that allows users to "subscribe" to a Web site for automatic content updates.

COVER STORY

- 961 **Adult Stem Cells:** The Use of Adult Stem Cells in Rebuilding the Human Face
P.G. Robey, P. Bianco
Drs. Robey and Bianco review what is known and not known about different types of stem cells and describe how stem cells can be used to restore the bones of the human face.

CLINICAL PRACTICE

- 973 **Treatment Planning:** Endodontic or Dental Implant Therapy: The Factors Affecting Treatment Planning
M. Torabinejad, C.J. Goodacre
The authors explore the major factors that can affect the decision regarding whether a tooth receives endodontic treatment or is extracted and replaced by an implant.
- 978 **Periodontal Surgery:** The Effect of Periodontal Surgery on Bite Force, Occlusal Contact Area and Bite Pressure
A. Alkan, I. Keskiner, S. Arici, S. Sato
The authors perform a quantitative analysis of bite force, bite pressure and occlusal contact areas using a pressure measurement film.
- 984 **Case Report:** An Unusual Pattern of Dental Damage With Salivary Gland Aplasia
L. Mandel
Dr. Mandel describes a patient with salivary gland aplasia, an uncommon cause of dental deterioration.
- 990 **Practical Science:** Managing Dentin Hypersensitivity
R. Orchardson, D.G. Gillam
The authors review the literature regarding dentin hypersensitivity to provide practitioners with information they can use in the diagnosis and clinical management of this condition.

RESEARCH

999 **Amalgam Separators:** Evaluating Amalgam Separators Using an International Standard

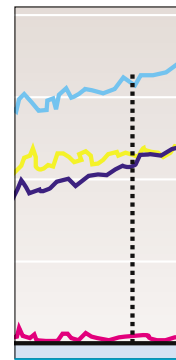

H. Batchu, D. Rakowski, P.L. Fan, D.M. Meyer

The authors evaluate the amalgam removal efficiencies of 13 commercially available amalgam separators and two commercially available filtration devices.

1006 **Prefabricated Posts:** An In Vitro Assessment of Prefabricated Fiber Post Systems

E.C.N. Teixeira, F.B. Teixeira, J.R. Piascik, J.Y. Thompson

Dr. Teixeira and colleagues compare the retention, mechanical behavior and light-transmission capacity of four different prefabricated posts cemented to the root canal with a dual-cured resin-based cement.

page 1006

1013 **Cervical Dentin Hypersensitivity:** Treating Cervical Dentin Hypersensitivity With Fluoride Varnish: A Randomized Clinical Study

A.V. Ritter, W. de L. Dias, P. Miguez, D.J. Caplan, E.J. Swift Jr.

Dr. Ritter and colleagues test the efficacy of a recently introduced 5 percent sodium fluoride varnish in the treatment of cervical dentin hypersensitivity.

PERSPECTIVES

1021 **Observations:** Overcoming the Challenges of Class II Resin-Based Composites

G.J. Christensen

Dr. Christensen explores the challenges observed when using resin-based composites for Class II restorations and suggests potential solutions.

1024 **A Better Practice:** Assessing and Correcting Dental Fees: An Essential for the Health of the Dental Practice

R. Collier

Dr. Collier stresses the need for dentists to set fees at levels that reflect the value of their services.

1026 **Ethical Moment:** May I Ethically Treat the Child of a Friend Who May Not Have Custodial Rights?

B. A. Largent

Dr. Largent examines the ethical issues related to treating the child of a friend who may not have custody of him.

CONTINUING EDUCATION

1027 JADA's continuing education program highlights treatment planning for endodontic or dental implant therapy; the effect of periodontal surgery on bite force, occlusal contact areas and bite pressure; managing dentin hypersensitivity; and treating cervical dentin hypersensitivity with fluoride varnish.
